Web Developer

Studio by Engrain is seeking a mid-level web developer to join our in-house development team. This position requires a combination of programming skills (namely PHP, HTML5, C333 and JavaScript) and aesthetics. We are looking for an individual with working knowledge of WordPress, experience with responsive mobile-first web development and adaptive development. Our web developers are instrumental in maintaining our place as a cutting edge, high-end creative agency and we're looking for a talented, driven individual who will bring a sense of urgency and innovation to our team.

Our high-quality standards are emphasized by our passion for what we do. As a member of our team, you will have the opportunity to uphold these standards while helping to foster a fun and energetic company culture. Studio was established in 1995 and is based out of Denver, Colorado.

You can expect to:

- Create interactive website experiences using HTML5 and CSS, PHP and WordPress
- Work with project management and design teams to translate ideas and goals into functional sites that align with client objectives, of course being completed on time and within budget
- Ensure that website elements focus on engagement, usability and compliance with current web and industry best practices
- Based on requirements and design specifications, manage content updates, and implement web site modifications and enhancements
- Optimize output to match the specific platform (i.e. mobile versus desktop)
- Support SEO efforts during website building and maintenance activities
- Perform testing of web applications and systems, engaging users when necessary
- Act as a participant in user acceptance testing and report results
- Recognize and recommend operational process improvements and identify issues that impact site users

We would like:

- 2+ years of PHP web development
- Strong understanding of HTML5 and CSS3
- Good working knowledge of Adobe Illustrator
- Proven experience with building front-end web elements
- Experience developing for multiple browsers and platforms (to include mobile and desktop)
- Working knowledge of WordPress
- Ability to effectively and accurately assess scope of work and effort required
- Ability to work constructively under tight deadlines in a fast-paced environment with aggressive timelines and multiple priorities
- Excellent analytical and problem-solving skills
- Collaborative team player
- Ability to gain clarity when direction is required
- Willingness to share best practices, continually improve processes and provide clear and consistent reporting to leadership
- Self-directed, proactive, and independent in a dynamic and aggressive startup environment
- This is not a remote position

What we offer:

- 100% coverage of employee's health, dental and vision coverage
- Immediate and generous paid time off
- Paid parental leave
- Matched 401k investment
- Annual stipend for personal growth plus options for professional training if needed
- Continuous professional growth and camaraderie with dev team lunch-and-learns
- Fabulous and talented co-workers
- Fun workplace with on-site amenities including professional fitness center, flexible and modern workspace, meditation room, unlimited coffee, happy hour at our on-site bar and comfortable employee lounge spaces
- Easy access to RTD Light Rail and company stipend toward RTD Flexpass

How to apply:

Email your cover letter and resume to: careers@wearestudio.com. *Note the position for which you are applying in the email subject line.*

Please include links to your GitHub or BitBucket profile as well as your StackOverflow profile, if available.

Studio is an equal opportunity employer (EOE). We strongly support and welcome diversity in the workforce.

All applicants must be authorized to work in the United States.
